IN AND OUT OF TOWN.

What is Being Said and Done in a Small Way.

Pleasant after the storm.

Senator Marker was in town yesterday.

Gen. Kittrell returned from the Great East yesterday.

John Whiteshead, of Pyramid, was on the streets yesterday.

Geo. A. King is in town. He has been up on the Comstock.

Six men are at work in the Harris mine, east of Washoe City.

Gen. Clarke and A. C. Ellis, of Carson, were in town yesterday.

J. E. Gignoux, of Dayton, was a passenger for the Bay yesterday morning.

Assessor Stoddard intends to pay a visit to his old Louisiana home this Fall.

Gen. Chas. Forman, Supt. of the Overman, went up to Virginia yesterday morning.

Eight business houses have joined the roll and last night closed their stores at 8 o'clock.

Pleasure seekers in the mountains caught more hail and blue blazes than fish, night before last.

H. C. Burchard, Mint Director, went through from Carson to San Francisco yesterday morning.

Mrs. Marsden, mother of W. L. Marsden, clerk at the Insane Asylum, left Reno Sunday for Los Angeles.

Prof. Gibbs having finished his investigation of the Prison foot-prints returned to San Francisco Sunday morning.

George Alt, with a party of neighboring farmers, will leave Glenvale to-morrow morning for a week's fishing at Pyramid Lake.

Billy Fogg is confined to his bed with a severe attack of bilious fever. Monday he was a very sick man, but was reported much better last evening.

Senator Kaiser and family, of Churchill county, passed through yesterday morning for Santa Cruz and San Rafael, where they intend to remain a few weeks.

Chamberlain has received word from the Commander of Mary's Commandery, of Philadelphia, to have breakfast ready for 150 of them on the morning of August 18th.

Geo. E. Thirl, an expert polisher, is established at the tonsorial parlors of John Belz, where, at a moment's notice, he will polish your boots in first-class city style.

Senator Marker was in town yesterday. He has moved the splints from his arm and carries it without the aid of a sling. He will have a much better arm and hand than he expected.

Ex-Sheriff Walker has become tired of city life and will return with his family to Reno, and in future make this his headquarters. He will continue in his present line of business.

A gentleman from California has leased the Ohio House, on Virginia street. He will take charge of the property on the 1st of August. He is family will arrive in Reno Saturday morning.

There is no truth in the statement going the rounds that the hide of Senator Marker's bull has been shipped to California. His Satanic Majesty, bide and all, is browsing on the hills back of Lovelock's.

Gen. Kittrell returned yesterday morning from White Pine. He says the climate at Treasure Hill is delightful but a look at the ruins of its former greatness kindled in his breast feelings similar to a visit to the grave of a departed friend.

One of the squarest grocerymen in Reno to deal with is M. Barnett, who is located in McFarlin block. Besides a full line of groceries he keeps the freshest of berries and other fruits constantly on hand, and receives a fresh invoice every morning.

UNSATISFACTORY SERVICE.

The Public Dissatisfied With the Pullman Sleeping Car Service.

The traveling public is not very well pleased with the new sleeping car service on the Central Pacific, and loud and deep are the mutterings. The Pullman Co. opened out with a raise of fifty cents a birth and a dollar a section between Reno and San Francisco, but they have deemed it wise to reduce to the old figures, and the present rates are the same as charged by the C. P. Two ladies were recently charged \$1.75 each for the privilege of riding on the Pullman from Reno to San Francisco, and other complaints are gradually coming to the surface.

Smith vs. Logan.

The case of Smith vs. Logan was concluded in the District Court yesterday. This was a proceeding against Logan for an alleged contempt of Court, by diverting and using the waters of Galena creek, in Washoe valley, in violation of an order of the court. After the case was submitted the Judge decided to visit the scene of the trouble and satisfy himself as to a conflict of testimony respecting the amount of water in the creek. The witnesses varied over 400 inches in their estimate of the amount. The plaintiffs claim that there is not to exceed 500 inches, while the defendants declare there is over 900. The Judge intimated that from the testimony before the Court, the defense was very weak and that the allegation of the plaintiff had been sustained. He reserved his decision, however, until 7 o'clock tonight when he returned from a visit to the creek.

A Dishonest Domestic.

Mrs. Abe Prescott, formerly of Reno, was recently victimized by a dishonest domestic named Ah Yee. She caused the celestial to be arrested last Saturday, as he was about to depart for China on the steamer Coptic. Yee was hired as a domestic by Mrs. Prescott on the 15th of last month; and the following day he complained of illness and an indisposition to work. Becoming saucy and offensive, however, he was summarily discharged on the second day of his employment, when he left uttering threats of revenge. He was seen on Thursday last in the Prescott house, which he had entered by a side window, soon after which the loss of diamonds valued at \$500 was noticed. The stolen property has not yet been recovered.

In Status Quo.

The Antelope mine is still in the hands of the Sheriff, under Clark's attachment. The Boston stockholders do not seem to be making any move in the matter, and it begins to look as though

the Company has decided to quit and allow the creditors to take the property and make the most of it. Capt. Griffin is in Minneapolis, Minnesota, and is in the dark as to what his Company will do in the matter. The mine is said to be a valuable one, the ore rich enough and plenty of it, but for some reason could not be successfully worked. It may take the course of thousands of others, change hands, a new company take hold and make a success of it.

Criminal Carelessness.

It is said the big fire in the timber above Verdi was started through the carelessness of sheep herders. They build fires wherever it best suits their convenience and leave them to burn thousands of dollars worth of valuable timber. The mountain sides are legitimate fields for grazing, but the timber growing there is sacred, and the individual who wantonly causes its destruction is guilty of a crime for which he deserves the severest punishment. A Government agent will drop in upon these thoughtless fellows some day and take in a whole range of sheep, and possibly land the leaders in the State prison.

Good Crops.

A gentleman who has been around the ranches in this county says that crops everywhere are much more promising than last year. He thinks the farmers will harvest a third more hay than any previous year. He says it is a noticeable fact that many of the farmers in the last few years have quit grain and are going back into hay.

He thinks the hay crop will be so abundant that farmers will find it difficult to sell at any price. Those who have stock can feed and turn it into money in that way, while the less fortunate stand a good show to be left.

Convalescing.

Dr. Lee, of Carson, has returned from Butte City, Montana, whither he went to attend his uncle, Dr. A. C. Bishop, formerly of Eureka, and a brother of Dr. S. Bishop of the Asylum, who was dangerously injured on the Fourth of July. He left his patient in a fair way to recover.

From the Carson Appeal we excerpt the annexed:

Five hundred catfish were caught out of Washoe Lake on Sunday.

Everyone is wild about the splendid fishing in Washoe Lake. Next Sunday perhaps there will be a hundred anglers out there.

KNIGHTS TEMPLAR TRIENNIAL CONCLAVE.

The Prizes to be Given for the Competitive Drill.

Great preparations are making in San Francisco for the Triennial Conclave of Knights Templar, which convenes on August 20th, and which will be attended by Sir Knights and ladies from all parts of the country. Quarters have already been secured for 4,000 knights, and the largest estimate of the members of the Order who will be present is placed at 7,000. The arrangements made by the local committee are on the grandest scale, and the reception of the visitors will be characterized by true California hospitality. Fifteen thousand dollars will be expended on arches and street decorations, and in the embellishment of the Mechanics' Pavilion and Masonic Temple, where the conclave will assemble. Consulting the comfort of the guests the resident managers have made contracts, in due and legal form, with all the hotels, and every place where a Sir Knight and his lady or family stops has bound itself to stipulated prices. Arrangements have also been made whereby visitors may go to any portion of the State and return on half-fare, by presentation of proper credentials to agents of the different transportation companies. It is intended to have one grand excursion over each of the principal railroad lines in the State, to be two or three days' duration, to enable visiting Sir Knights to view everything of interest.

The five trophies offered as prizes to the five best drilled Commanderies will exceed in value any heretofore proffered. The body of prize No. 1, manufactured by L. Miller of San Francisco, consists of a solid mass of silver in the form of a vase, being eleven and one-half inches in height and twenty-four inches in circumference, having on either side a handle of massive silver surmounted in gold, each handle containing eighteen separate compartments of gold quartz and silver specimens, etc., in polished slabs; the handles protruding from side of vase, making a total width of thirteen inches. On the top of one of the handles is a group of battle implements, in the centre of which are Knight Templar crosses, made of gold and silver, between the shields, and crossing each other is a battle-ax and sword. On the top of the other is a helmet, lance and gauntlet, likewise made of gold and silver. On the reverse side of the vase is an emblem of the coat-of-arms of the State of California. On the reverse side is an emblem of the coat-of-arms of the Grand Commandery. The cover of the vase is a cylindrical mineral cabinet containing granulated particles of different minerals of California mines, in all twenty-six compartments in numbers, and classified. On the top of this cylinder is a Knight Templar on horseback, of gold and silver, both horse and Templar in complete armor. The vase rests on two horns of cornucopia, in gold and silver, the one containing the vinicultural and agricultural products of the State of California, the other containing gold quartz. On the front side of the vase, and resting on a circular plate, is a miner, of gold and silver, five and one-half inches in height, examining a quartz specimen; on the reverse side is a farmer resting on his plow. The horns, miner and farmer are standing on a circular plate eleven inches in diameter, and one and one-half inches in height, on the bevel side of which are represented eight cabinet designs of Knight Templar crosses; and between these slabs of gold quartz, etc. The bottom of this circular plate, and representing the foundation of the trophy, rests on four bear's feet. The entire height of the trophy is twenty-four inches, and the weight not less than two hundred ounces.

Prize No. 2, manufactured by George C. Shreve & Co. of San Francisco, is a mounted Knight in armor, made of bronze, silver and gold, standing on a column of California onyx. Beneath the capital and surrounding the column are four shields of gold-bearing quartz and specimens of the minerals of the State of California, and four medallions, in silver and gold, representing a mining scene, Yosemite, The Big Trees, an insignia of the Grand Commandery of California; around the column are twined grape-vines and clusters of grapes in oxidized silver. At the base are banners and Knight Templar armor in silver and bronze, with a shield bearing the cross, and another the coat-of-arms of the State of California. The whole stands four and a half feet high.

Prize No. 3, also manufactured, as No. 4, by Shreve & Co., is a revolving globe of silver, ten inches in diameter, California being represented on the map by solid gold inlaid. A figure of a Knight in armor with drawn sword standing on the globe is made of gold and silver. Beneath the globe and to the right is a fort made of polished gold quartz. To the left are tents of silver. The center is filled with Templar armor and banners of silver, with a large central medallion containing three leaders of the first crusade, and medallions on either side with Templar emblems in

gold-bearing quartz and specimens of ores. To the right and left, leaning against the base, are two grizzly bears of oxidized silver. The piece stands two and a half feet high, and rests on a pedestal of maroon velvet.

Prize No. 4 is a silver plaque, eighteen inches in diameter, the centre a finely engraved view of Yosemite, with a border filled with gold bearing quartz and specimens of ore; an outer border contains four medallions of Knight-Templar emblems, and four medallions with California subjects—Sutter's Mill, Farmer, Miner and the Big Tree. Twined about the medallions are grapes and leaves of silver in full relief. A silver bear surrounds the top of plaque. An easel five and a half feet high, to support the plaque, is made of polished California woods, the design being battle-axes, sword and Templar emblems.

Prize No. 5, manufactured by Randolph & Co., of San Francisco, is a solid silver vase, surmounted by a Knight Templar in armor, on horseback, and bearing the grand beaumant, the standard of the Order, the whole being twenty-one and one-half inches in height. The front view presents an engraving representing tents, with a sentinel at each, and pilgrims journeying to the Holy Land. On the back there is represented a Knight on horseback in the display drill. On the sides are handles, elaborately carved, and ornamented with wreaths. Around the base are engravings representing the coat-of-arms of the State of California, agriculture, art, chemistry, etc.

A Capital Idea.

An item appeared in the JOURNAL a week ago telling of the wonderful success of artesian wells at Denver, Colorado, and suggesting the propriety of trying the experiment here. A prominent Reno business man has been investigating the matter since, and has concluded to make an effort to organize a joint stock company for the purpose of trying the experiment at some suitable point in the county, to be hereafter determined upon. He is now in correspondence with parties in the East who make well-boring a business, and in a short time can make an intelligent estimate of the cost. A Denver man writes that there is no difficulty in sinking a well anywhere, no matter what the formation is. He does not guarantee to furnish flowing water, but contracts to put the well down a given depth for a stipulated sum or no pay. It may be that Nevada's desert waste may yet be reclaimed by means of artesian wells. Who can tell?

Encampment Officers.

The installation of officers of Reno Encampment, No. 5, I. O. O. F., took place Monday evening, as follows: C. P., Geo. Muies; S. W., Al White; H. P., A. C. McFarlin; Scribe, Dan Boyd; Treasurer, Tom Barnett; J. W., John Bowman; Outside Sentinel, C. W. Clark; Inside Sentinel, H. P. Nelligan; Guide, C. D. Noyes; 1st W., F. C. Updike; 2d W., R. F. Hoy; 3d W., Alfred Nelson; 4th W., E. C. Leadbetter; 1st Guard Tent, J. A. McIntosh; 2d Guard Tent, E. Nowattany.

The Atlantic and Pacific.

Supt. Forman, who came up from the Bay yesterday morning, recently took a ride over the Needles division of the new Atlantic and Pacific Railroad. He says the bridge at the Colorado will be repaired in three or four days, and trains enabled to pass over, when active travel will set in on the new road, which is the shortest route east. Mr. Forman says that country is something like the lower levels—from 105 to 120 in the shade.

Genuine Lager Beer.

Geo. Becker is making as good beer as can be brewed from malt, hops and pure mountain water. It is not dextored nor drugged, and physicians say it is nutritious as bread, as stimulating as wine, and as easily digested as beer. If you want genuine lager, get Becker's which is warranted pure and is invigorating and nourishing.

Changed Hands.

The Greenville Bulletin says "according to information received, the large tract of timber land in the vicinity of Big Meadows, formerly owned by the Sierra Flume and Lumber Company, has passed into possession of the O. P. Railroad Company. This makes the building of a railroad through that region all the more probable."

The application of the Central Drain Ditch Company to obtain an order of Court to restrain the North Truckee Drain Ditch Co. from running waste water through the former's ditch, occupied the District Court the greater part of yesterday. At the conclusion of the arrangements the Judge took the matter under advisement and will probably render a decision to-night.

Gen. Evans has returned from his prospecting trip through Plumas county. He did not find the mine he went after but found another which he believes to be a better one.

A new Lodge of Workmen was instituted last night in Masonic Hall by Grand Master McKinley.

NEW MINING INSTRUCTIONS.

Amendments—Regulations Amendatory of the Circular of October 31, 1881.

The following circular from the Interior Department is of general interest to all in Nevada:

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE
WASHINGTON, D. C., JUNE 8, 1883.
To Registers and Receivers and Surveyors General.

GENTLEMEN: The following additional regulations are promulgated as amendatory of circular of October 31, 1881, entitled "United States Mining Laws and Regulations Thereunder," which, except as herein modified, will remain in full force:

1. No application will be received, or entry allowed, which embraces more than one lode location.

2. A party who is not an applicant for patent under section 2325, Revised Statutes, or the assignee of such applicant, is not entitled to make entry under said section, and in no case will the name of such party be inserted in the certificate of entry. This regulation has no reference to proceedings under section 2326.

3. Any party applying to make entry as trustee must disclose fully the nature of the trust and the name of the certain trustee; and such trustee, as well as the beneficiaries, must furnish satisfactory proof of citizenship; and the names of beneficiaries, as well as that of the trustees, must be inserted in the final certificate of entry.

4. Where an adverse claim has been filed and suit thereon commenced within the statutory period, and final judgment determining the right of possession rendered in favor of the applicant, it will not be sufficient for him to file with the Register a certificate of the clerk of the court, setting forth the facts as to such judgment, but he must before he is allowed to make entry, file a certified copy of the judgment, together with the other evidences required by section 2326, Revised Statutes.

5. Where such suit has been dismissed, a certificate of the clerk of the court to that effect, or a certified copy of the order of dismissal, will be sufficient.

6. In no case will a relinquishment of the ground in controversy, or other proof, filed with the Register or Receiver, be accepted in lieu of the evidence required in paragraphs 4 and 5.

7. Where an adverse claim has been filed, but no suit commenced against the applicant for patent within the statutory period, a certificate to that effect by the clerk of the state court having jurisdiction in the case, and also by the clerk of the circuit court of the United States for the district in which the claim is situated, will be required.

8. Possessory title to a lode claim held and worked for a period equal to the time prescribed by the statutes of limitations for mining claims of the State or Territory where the same may be situated, may, in absence of any adverse claim, be established in the same manner as now allowed in placer claims, and indicated generally in paragraphs 67, 68 and 69, of the circular hereby amended.

9. No entry will be allowed until the Register has satisfied himself, by a careful examination, that proper proofs have been filed upon all the points indicated in official regulations in force, and that they show a sufficient bona fide compliance with the laws and such regulations. A strict observance of this regulation will be required.

L. HARRISON,
Approved: Acting Commissioner.
H. M. TRELLES, Secretary.

July 8, 1883.

TOM AND JERRY.

The Democratic cry is now, "The Old Ticket"—Tilden and Hendricks standard bearers in 1884. The cry is not unanimous however, for some of the most influential papers in that party want to substitute Jerry Black for Tilden. This, it occurs to us, would make a consistent ticket, as it would afford the patriotic effusionists an opportunity to rally around the flag of "Tom and Jerry."

Kearney Lectures in New York.

Denis Kearney delivered a speech at Cooper Institute, New York, last Saturday evening to an audience of 20,000 persons. He was well received, and his remarks listened to with attention and frequently interrupted with applause. He said a convention of wage-workers would be soon held, at which laboring men throughout the country will be represented.

A Brazen Man Killed.

Sunday at Sprague, Washington Ty. Len Harris, Jr., while coupling cars, was killed. He lived in Sacramento until recently and was the son of Len Harris, a Central Pacific detective.

The strike of the railroad laborers on the extension of the Oregon branch of the Central Pacific Railroad has ceased, and the whole force of about four thousand men are at work grading and track laying.

A great deal of fun has been made of the Carson maiden's mouth, but the Eureka girl who stole \$25 in trade dollars and hid them under her tongue is entitled to the entire bakery.

A BORAX BOOM.

A Thriving Industry Growing Up in Our Desert Plains.

The Candelaria True Fissure of last Saturday says:

Columbus, after a long period of quietness, is becoming a lively camp once more. It would be vain to expect it ever to regain its old-time bustle and activity—the days of "booms," in the full meaning of the term, have passed away—when it was the metropolis of the country. This renewed life is due to the almost entire relocation of the borax marsh, and in many instances the erection of works by the relocators. The increase in the price of borax, and new methods of reducing the crude, are the primary causes of operations being resumed, while the discovery of richer deposits of the crude material is the secondary one. Within the past week several thousand acres of land have been located and recorded, one or two plants have been erected, and others are in the course of erection. G. L. Turner & Co. have commenced the manufacture of borax, meeting with encouraging success, the first tank yielding 600 pounds of fine borax. The company has 120 acres of land, and expects to produce about ten tons of borax per month, worth about \$15,000. Goodwin & Roach are erecting six tanks, and intend to add six more as soon as practicable. They have 400 acres of ground and will manufacture a ton a day when the twelve tanks are in running order. Roach has had great experience in the business, having been in charge of the works at Teal's marsh for several years. The practical knowledge thus gained will materially add to the chances of success. Schwartz & Molini are working a large pile of tailings, originally from Teal's marsh, and are attaining satisfactory results. The tailings were worked some ten years ago, being hauled some fifteen miles for that purpose. Marrotte & Co. are about to erect works on their claim of some 200 acres. Other parties have located ground and will probably erect tanks and boilers, but at present they seem inclined to wait the developments made by the operators mentioned.

The Grantsville Bonanza, of recent date, reports a renewal of operations in Churchill county, saying:

John W. Ballard and Peter Leffler returned from Churchill county on the evening of Tuesday. They were over there looking up a borax marsh.

We understand that they have discovered a beauty which it is their intention to locate. The marsh covers an area of about two miles square. Borax is a marketable commodity and brings a good price at present.

The Candelaria True Fissure has another little item bearing upon the subject, which reads as follows:

Some 1,300 acres of borax land have been surveyed on the borax marsh, near Columbus, during the past ten days.

Who Invented the Telephone?

Now comes William E. Channing, M. D., and in the Popular Science Monthly calls attention to the fact that a book is about to be published in England and in this country, giving a history of the telephone invented in Germany by Johann Philip Reis, with a biography of the inventor by Professor S. P. Thompson. We have supposed that Bell and Edison were the original discoverers of the telephone system now in use. But according to this authority they were not.

That fine field of alfalfa belonging to the Orphan's Home farm is all dying out for want of water.—Carson Index.

We hope we shall not be considered presumptuous if we rise to remark that if the Orphan's Home was at Reno there would never be a lack of water. The Asylum grounds are one beautiful carpet of Nature's own true green.

The obituary has a controlling influence here—John H. Wise in letter to N. Y. Times.

Yes; that's what the obituary has found out, to its utter disgust. In the division of offices no Irish or Germans need apply. The appointments to salaried positions are for "gentlemen who owned their own niggers before the wah, wah."—S. F. Post.

Somebody calls the trade dollar as "bastard." We suppose that is because the poor thing has no "p."

Body snatchers are already concocting a plan to secure the body of S. J. T. after '84, and hold it until '88.

Advice to Mothers.

Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth? If so, send at once and get a bottle of Mrs. Winslow's Soothing Syrup for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures dysentery and diarrhea, regulates the stomach and bowels, cures wind colic, softens the gums, reduces inflammation, and gives tone and energy to the whole system. Mrs. Winslow's Soothing Syrup for Children Teething is pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States, and is for sale by all druggists throughout the world. Price 25 cents a bottle. Feb. 21-swf-jyr.

The strike of the railroad laborers on the extension of the Oregon branch of the Central Pacific Railroad has ceased, and the whole force of about four thousand men are at work grading and track laying.

A great deal of fun has been made of the Carson maiden's mouth, but the Eureka girl who stole \$25 in trade dollars and hid them under her tongue is entitled to the entire bakery.

ELKO COUNTY MINES.

Prospects Lively in Every Mining District.

Notwithstanding the dry set up by croakers and others that the mining interests of Eastern Nevada are retrograding the mining outlook in Elko county is just at present exceedingly bright, and considerable activity is being manifested in the work of developing the various properties in the different districts throughout the county. The Elko Free Press says of it:

At Bullion, Railroad District, a good deal of prospecting and dead work has been done during the past year. Considerable ore has also been extracted and is now awaiting reduction. F. J. Franks, Supt. of the Elko Consolidated, has received orders to go ahead and make all necessary preparations for putting in place the new 30-ton water-jacket furnace which is now on the way from Elba Iron Works, San Francisco. He was in town Wednesday for lumber and other needed materials. There is also a car load of coke here for the same company. They have a large amount of ore on the dump and will commence smelting as soon as the furnace is in place.

C. A. Brosemer is working his mine with renewed vigor and is opening out a fine looking piece of property.

There are several other claims in the district being put in shape for working at an early date, and it begins to look as if Railroad would soon come to the front again with bullion.

New life has been infused into Lone Mountain, and the district is now attracting more or less attention. It is located about 25 miles from Elko, and has some fine looking properties. Several Tuscarora parties have lately inspected the ground and a good many locations have been made. Mr. Weston has been working a number of promising claims, and Mr. W. J. Norris has just completed arrangements for commencing active operations on three of his claims—the Copper Queen, Mystery and Copper Bonanza. Mr. Clark of the Depot Hotel, is interested with him in these claims. Considerable good ore has been taken out of the mines of this district during the past, and there is still plenty left. There will be a boom at Lone Mountain before long.

The mines at Kinsley District, recently sold to an Eastern Company, are being opened out thoroughly, between 40 and 50 men being employed in the company's mines. They are taking out a good quality of ore and shipping it to Baltimore and New York for treatment. The claims are all looking fine and the new owners are much pleased with their property.

At Bull Run Basin, near Columbia, Jas. Clark & Co., are opening up some good mines. The ore is galena and silver. They have a 5-stamp mill and concentrator running on ore from the Richmond mine. They ship the concentrations to Salt Lake for further reduction. The mill is run by water power and is doing good work.

They ship the concentrations to Salt Lake for further reduction. The mill is run by water power and is doing good work.

There are several other districts in the county that are looking better than they have for years, and with Tuscarora in the lead Elko will soon be the largest bullion producing county in the State.
